DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/17/2009 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 21-25, 29, 30 and 39-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Vigil et al. (5,320,634).** Vigil et al. disclose a medical balloon having first and second ends (22a and 22b) and a body portion there between. The balloon has a contracted condition (see figure 3B) where a plurality of structures are present because of folding, each structure comprising a double wall base and first and second wings extending in opposite directions, the structures being T-shaped structures. The structures of the balloon in the expanded condition disappear and the balloon is circular in cross-section (see figure 3A). The wings are capable of overlap when compressed more completely than shown in figure 3B.

Response to Arguments

4. Applicant's arguments with respect to claims 21-25, 29, 30 and 39-41 have been considered but are moot in view of the new ground(s) of rejection.
